Many of our showers are suitable for all house systems – just look out for the symbol.

Key technologies

Mira Magni-flo™

The unique patented technology of Magni-flo™ provides our mixers with up to 3 times more water flow than similar mixer showers*, even at low pressure. Making Mira Mixers the most powerful mixers available in the UK today.

*When tested under identical conditions against a range of similar mixers at 0.1 bar pressure, which is normal in homes with low pressure. Results show that mixers with Magni-flo™ can give up to 3 times more flow than mixers from other shower companies.

Mira Thermostatic

Thermostatic

Ensures that the temperature always stays to within +/-2 degrees, a safety feature that makes these showers ideal for those who have young or elderly family members.

Mira Opti-flo™

Gives you a wider selectable flow range which means you can enjoy the full power of the shower even in the summer months when the incoming water temperature is higher.

Mira Sensi-flo™

Prevents scalding in the event of a loss of water pressure or if the showerhead or hose become blocked.

Mira Clearscale™

Incorporates Mira DualElement™, phased shutdown and rub-clean nozzles to cut limescale by 50% so the shower performs better and lasts longer.

Mira DualElement™

The heater tank runs at cooler temperatures than conventional technology providing constant power throughout the element which reduces "hot spots" where limescale can accumulate.

Guarantees

We are confident that you will enjoy many years of trouble free service as all our products are manufactured to the highest standards. Guarantees come as standard at Mira – simply look out for the symbols.

Water. We've learnt from every droplet.

90 years of curiosity means we've learnt a lot about water. About how to make it invigorating, refreshing and soothing. We've used this expert knowledge to create some of the most exquisite and innovative designs in showering, from our digital showers to elegant taps and accessories. And now it's time to find the ones most perfect for you.

Follow steps 1, 2 and 3, then discover more about the shower that'll be just right for your household.

Choosing your shower

Step 1: What kind of water system do you have?

Low pressure gravity system

You'll know you have this system if:

There's a cold water tank in your loft and a hot water cylinder in your airing cupboard.

We recommend:

- Mixer showers (with optional pump for stronger flow)
- Digital mixer showers
- Power showers

High pressure - mains pressure combination boiler

You'll know you have this system if:

You have a boiler the size of a small kitchen cupboard somewhere in your house – you won't have hot and cold water tanks.

We recommend:

- Mixer showers
- Digital mixer showers
- Energy-saving eco showers

High pressure - mains pressure unvented

You'll know you have this system if:

You have a boiler the size of a small kitchen cupboard somewhere in your house.

We recommend:

- Mixer showers (for a powerful flow)
- Digital mixer showers (for a powerful flow)
- Energy-saving eco showers

Cold mains supply

You'll know you have this system if:

You don't have stored hot water at all or, don't want to use up all the hot water when you have a shower.

We recommend:

- Electric showers (the higher the kW rating, the stronger the flow)
- Pumped Mira Elite ST for low pressure cold water supplies*

*Must be tank fed

At a glance

Compatible with all systems.

Mains pressure combination boiler. Mains pressure unvented. Low pressure gravity with pump.

Low pressure gravity system.

Cold mains supply only.

NOTE: If in doubt, give us a call or contact a qualified plumber.

Step 2: What type of shower do you need?

If you're replacing a shower and you don't want to re-tile, it's worth checking the position of the hot and cold water pipes and the shape and size of the replacement shower. That way you'll be sure that the new shower fits over the old screw holes and onto the pipework. To make life easier, some of our mixer showers have adjustability on the inlet pipe centres.

Mixer showers

Mixer showers take water from both your hot and cold water supplies and mix it to create your ideal temperature.

- Most Mira mixers feature Magni-flo™ which provides up to 3x more flow even on low pressure
- Optional Mira twin enduro pumps for low-pressure systems
- Range of styles and sizes
- Choice of temperature control – manual, pressure balanced or thermostatic
- Most mixers work on all water systems

Power showers

Power showers take water from the stored hot and cold water supplies and mix it together to create your ideal temperature. All-in-one power showers have an in-built pump which also boosts the flow of water.

- Choose either an all-in-one or mixer shower and pump combination
- Perfect for homes with plenty of hot water
- Not suitable for high pressure systems

Digital mixer showers

Digital mixers take water from your hot and cold supplies and mix it together. The digital technology ensures you enjoy the exact temperature, every time.

- Variants available for different systems
- Stabilises temperature digitally
- Additional warm up and lock off modes
- Easy to install
- Mixer unit can be mounted away from the shower, such as in the loft
- Reduced pipework
- Remote wireless control

Electric showers*

Electric showers take water from your cold water supply and warm it by passing it safely over heating elements contained within the unit.

- Works even if your boiler fails
- Works without the need for stored hot water
- All our electric showers are approved as water efficient because they use less water
- The pumped Mira Elite ST is available for low pressure gravity systems

Eco showers

Our eco showers use flow regulators to limit the maximum flow of water, and our eco showerheads uses aerating technology to create the sensation of a normal, drenching flow while using a lot less water. Our eco showerheads are to be used with our mixer showers only.

*If you're replacing an existing electric shower your installer will need to ensure that the installation complies with the latest wiring regulations.

Step 3: Our shower selector makes choosing easy

Low pressure gravity system

You'll have a cold water tank in your loft and a hot water cylinder in your airing cupboard.

Do you have a good supply of hot water, for example could you fill a bath?

YES

Are you happy using some of your stored hot water for the perfect shower?

YES

Showering is the most important part of my day.

NO

I love showers, but I've got other things to do – like the washing up.

NO

WE RECOMMEND AN **ELECTRIC SHOWER**

Mains pressure combination boiler

You'll have a boiler somewhere in your house, and you won't have hot or cold water tanks.

WE ALWAYS RECOMMEND A **MIXER SHOWER** OR A **HIGH PRESSURE DIGITAL SHOWER**

If you've got a combination boiler, always fit a mixer shower for great performance and the perfect shower experience

Mains pressure unvented system

You'll have a hot water cylinder in your airing cupboard but no cold water tank in your loft.

Are you happy using some of your stored hot water for the perfect shower?

YES

Showering is the most important part of my day.

NO

I love showers, but I've got other things to do – like the washing up.

Is it important to be able to have a hot shower any time of the day?

Cold mains supply

You won't have enough hot water, or don't want to use the hot water you have to shower.

Is your mains pressure reliable?

YES

The pressure never changes.

Would you prefer thermostatic control that gives great temperature stability.

NO

The pressure can vary dramatically.

WE RECOMMEND **MIRA ELITE ST***
*Must be tank fed

Mixers

Mixer showers are ideal if you have lots of stored hot water, and if you have a high pressure system, a mixer shower should give you a more powerful flow than an electric one.

Mixer showers take water from your hot and cold supplies and mix them to create the perfect temperature. Most Mira mixers work on all the common UK water systems, but it's important to check before installation. If you have a low pressure system, you can boost the flow by adding a Mira shower pump.

Mira Magni-flo™

Make your showering experience the very best it can be with our revolutionary **Mira Magni-flo™** technology.

Our unique, patented **Mira Magni-flo™** technology really sets our mixer showers apart. The revolutionary design provides up to 3 times* more water flow, even at low pressure. Making Mira mixers the most powerful mixers available in the UK today.

To experience the power of our **Mira Magni-flo™** technology, watch our video on the Mixer showers section of our website.

*When tested under identical conditions against a range of similar mixes at 0.1 bar pressure, which is normal in homes with low pressure. Results show that mixers with Mira Magni-flo™ can give up to 3 times more flow than mixers from other shower companies.

Overview - mixer showers

We've got a wide range of designs to choose from. Some of these designs are available in different configurations – EV, BIR, BIV, ER and ERD, so you can choose the style and configuration to suit you.

Valve types explained

EV

exposed variable

The shower control is mounted on the wall. Your shower comes with a showerhead, hose, clamp bracket and slide bar. Some models also come with a soap dish.

BIR

built-in rigid

The controls and showerhead are both built into the wall. There's no hose or slide bar, so your shower has a minimalist look.

BIV

built-in variable

The shower control is built into the wall for a smart, clean finish. The shower comes with a showerhead, hose, right-angled hose connector, clamp bracket and slide bar. Some models have a soap dish too.

ER

exposed rigid

The shower control and showerhead are both mounted on the wall on a single riser bar.

ERD

exposed rigid with diverter

The shower control and showerhead are both mounted on the wall on a single riser bar. The shower also has a second adjustable showerhead.

Mira Agile

A neat, contemporary shower with a smooth, easy to clean form.

Product features

- Flush to wall unibody design eliminates conventional plumbing fixings
- Separate temperature and flow controls (excludes Agile S EV which has one single control for on/off and temperature)
- Mira Magni-flo™ gives up to 3 times more flow than similar mixer showers even at low pressure
- Revolutionary new installation system with 50mm pipe centres for quick and easy installation
- Compatible with Mira Agile plug-in accessories (excludes Agile S EV)
- Complements Mira Evolve tap (see page 118-119)

Mira recommends...

contemporary yet luxurious.

Make your modern bathroom complete with the elegant features below. Each is stunningly streamlined, and perfect with the Mira Agile ERD shower. Together their contemporary designs will complete the neat and minimal look beautifully.

The Mira Agile ERD mixer shower not only looks contemporary and simple, but is simple to clean too.

The Mira Flight Safe Trays range is non-slip, non-chip and uses revolutionary BioCote® technology to reduce bacteria.

The Mira Leap enclosure range is high quality in every way, from its screwless installation to its toughened safety glass.

The Mira Evolve Monobloc basin mixer combines pure geometric style with incredible function and prevents everyday build up.

118

The Mira Evolve Monobloc basin mixer combines pure geometric style with incredible function and prevents everyday build up.

108

The Mira Flight Safe tray is non-slip, non-chip and uses revolutionary BioCote® technology to reduce bacteria.

80

The Mira Leap enclosure range is high quality in every way, from its screwless installation to its toughened safety glass.

Mira Agile Eco

A neat, contemporary shower which delivers a great performance whilst using up to 50% less water.

Product features

- Flush to wall unibody design eliminates conventional plumbing fixings
- Saves up to 50% more water compared to standard Agile S EV – meets code for sustainable homes requirements, whilst still maintaining performance
- Separate temperature and flow controls
- Revolutionary new installation system with 50mm pipe centres for quick and easy installation
- Compatible with Mira Agile plug-in accessories
- Multi-mode 90mm showerhead with rub-clean nozzles for easy limescale removal
- Minimum pressure required of 0.5 bar

Digital

Digital showers, like mixers, take water from hot and cold water supplies and then mix them, creating your ideal temperature.

Our digital showers use separate mixer unit and shower controls. This means you can mount the slim mixer unit away from the shower, like in a loft or under a bath, reducing the amount of pipework. Plus, the shower controls take up very little space, creating an overall streamlined and sophisticated look.

Shower controls don't get more flexible than our wireless controllers featured on pages 50 and 51. Take a look.

Warm-up Feature

No need to step in until the temperature is just right thanks to the warm-up feature.

Pre-programmable

Set your maximum temperature limit and duration of your shower or bath fill at the touch of a button.

Multi-function

Whether you're showering, filling a bath or a combination of both... the choice is yours.

Digital Display

The digital clock display and shower timer ensure that you'll never be late again.

Eco Mode

Conserve water and make a saving with the Eco setting.

The 3 parts that make up a digital shower with wireless control.

1. WIRELESS SHOWER CONTROL

2. REAR OR CEILING FED SHOWER FITTINGS

3. DIGITAL MIXER UNIT

Digital showers

Mira Platinum

Beautifully designed and easy to use, this wireless digital shower has got it all – innovation and great looks.

Product features

- Separate temperature and flow controls
- Maximum temperature setting for increased safety
- Programmable functions: warm-up mode, clock display and Eco setting

Electrics

Our electric showers are packed with exclusive innovations, advanced technology and clever safety features.

All of our Mira electric showers use our unique and patented **Mira Clearscale™** technology, which is proven to reduce the build up of limescale by up to 50%. This means your incredible Mira experience will last and last. Discover more by watching our video on the Electric showers section of our website.

A big advantage of electric showers generally, is that they don't use any stored water at all. They only use water from your mains cold water supply, making them a great choice for most homes. They heat the water when you turn the shower on, passing it over a built-in heating element, similar to how a kettle works.

All Mira electric showers are so economical with water that they meet the stringent standards of the Bathroom Manufacturers' Association (BMA). Just another thing that will make your showering experience even more satisfying.

Key technologies

Mira Clearscale™ incorporates **DualElement™**, phased shutdown and rub-clean nozzles. This reduces limescale by 50% so your shower performs better and lasts longer.

Mira Sensi-flo™ helps prevent scalding if there's a drop in water pressure or if the showerhead or hose becomes blocked.

Mira Opti-flo™ gives you a wider range of flow rate so you can enjoy the full power of the shower. Ideal in the summer months when incoming water temperature is higher.

Mira DualElement™ the heater tank runs at cooler temperatures ensuring constant power throughout the element. This reduces 'hot spots' where limescale tends to accumulate.

Mira Airboost™ gives you a greater flow for a greater sensation, without using more water. Air alone boosts the power of your shower by 30%.

UK and Ireland kW conversions

Power

Nothing beats the exhilaration of standing under a truly drenching flow of cleansing water. With an internal pump to boost the flow, these showers deliver this stunning experience every single time.

Power showers mix water from both your hot and cold supplies on low pressure systems to give you your ideal temperature.

If you've got a plentiful supply of hot water in your home, a power shower could be ideal.

If you'd like a powerful flow but would prefer a mixer shower, you can install a separate shower pump - see page 43 to find out more.

Which temperature control?

There are two different types of temperature control available for power showers:

Manual – your shower will not compensate for changes in the incoming supply of pressure and the shower temperature may change.

Thermostatic gives you great temperature control and is ideal for people who are at risk, such as the very young or elderly.

Mira Vigour Manual

True invigoration. The perfect blend of performance and price.

Enclosures

Our Mira Leap enclosures have been produced to the highest possible standard, and designed to make a stylish statement in any bathroom.

At Mira, we don't just aim for perfection with the shower itself, but with everything that surrounds it. So for our Mira Leap enclosures and bathscreens, we thought about every single detail. Developed to the highest possible quality standards, Mira leap has strong lines, neat surfaces and invisible fixings, resulting in a stylish, contemporary aesthetic both inside and outside the enclosure. With a wide range of both doors, panels and walk-in options, there is a Mira Leap to suit any bathroom in need of an upgrade. The operation of Mira Leap is as slick as it is aesthetic, with premium double rollers and precision engineered hinges producing a consistently smooth action and feel. With a Mira lifetime guarantee, peace of mind is assured for many years to come.

Key technologies

CleanCoat® glass coating technology and cleverly hidden mechanisms make each of our Mira Leap enclosures incredibly easy to clean.

'Twist & Lock' is an installation system unique to Mira, removing the need to drill through the door and wall to attach fixtures, saving both time and effort. And because the fixtures are hidden, they don't interrupt the smooth finish of the enclosure.

Shower enclosures

Mira Leap pivot door

These elegant frameless doors pivot on discreet hinges enabling part of the door to open into the enclosure, helping save space in your bathroom.

Product features

- Reversible doors with twin chrome handles
- 6mm toughened safety glass with CleanCoat® glass coating technology
- 30mm adjustment on each wall jamb for uneven walls
- Adjustable pivot blocks and twin ball catches
- No visible fixings or screwcaps for a clean & uncluttered look
- Patented 'Twist and Lock' screwless installation system
- Height from top of tray: 1900mm
- Lifetime guarantee

Shower enclosures

Mira recommends...

Functional yet beautiful.

If you're thinking about removing your bath and having an enclosure fitted, we have just what you need to replace it beautifully. The products below work together so you can create a wonderful new feature for your bathroom, with everything you could need, without compromising on style or space.

The **Mira Leap 1700 double sliding doors** are beautifully designed with luxury chrome handles, and a smooth exterior.

The **Mira Flight Safe tray** is non-slip, non-chip and uses revolutionary **BioCote®** technology to reduce bacteria.

The **Mira Vision Dual digital shower** is the ultimate in luxury showering technology with its overhead and hand shower in one.

The **Mira Premium Shower seat** has a slim-line design and easily folds away when not needed.

53

The Mira Vision Dual digital shower is the ultimate in luxury showering technology with its overhead and hand shower in one.

108

The Mira Flight Safe tray is non-slip, non-chip and uses revolutionary **BioCote®** technology to reduce bacteria.

Shower enclosures

138

The Mira Premium Shower seat has a slim-line design and easily folds away when not needed.

Trays

Mira Flight shower trays are not only lighter, stronger and easier to fit, they are renowned for leading technology too.

We've brought the Mira Flight range right up to date with a contemporary, sleek look and a host of reassuring features you'd expect from Mira. Made from strong acrylic capped resin stone our Flight trays are incredibly robust. They're also scratch and chip resistant and designed to keep their great colour for a lifetime.

Exclusive leading technology

Every Flight tray includes exclusive BioCote® technology which reduces bacteria and mould growth by up to 99.9%.

Shower trays & wall panels

Mira Flight trays

Product features

- Scratch, chip and discolouration resistant
- Two optional riser kits featuring strong 'push-fit' legs for solid floor applications - flexible height or flush fit options
- White walk-on waste, which adds to the slim-line, stylish finish
- Includes BioCote® to reduce bacteria and mould growth by up to 99.9%
- Variants with integral upstands for watertight performance
- 10 year guarantee for home use

Shower trays & wall panels

Mira Flight Low Trays

Made from durable acrylic capped, resin stone, Mira Flight Low isn't just incredibly tough and surprisingly light, it's also one of the lowest trays you can buy.

Our impressive low profile tray is a super thin 40mm, making it one of the lowest trays in production. It allows you to create that amazing 'wet-room' look in any bathroom. Mira Flight Low trays also have all the hardwearing benefits you'd expect, ensuring they're chip and scratch resistant whilst keeping their great colour for a lifetime.

Exclusive leading technology

Each one features a Mira Flight Low waste which rapidly sucks water from the tray.

They also include exclusive BioCote® technology, proven to reduce bacteria and mould growth by up to 99.9%.

Other outstanding features include:

- Optional riser kit featuring strong 'push-fit' legs for solid floor applications
- A slimline waste cover
- High flow waste
- 10 year guarantee for home use

40mm

Mira Flight Low trays

Product features

- Only 40mm high
- Scratch, chip and discolouration resistant

Mira Flight Safe Trays

Developed with our exclusive Mira Safe surface, Mira Flight Safe trays exceed the most stringent independent anti-slip tests in the UK.

Designed to the same high standards as all Mira Flight trays, complete with durable acrylic and resin stone, this Flight tray features our own market leading anti-slip technology, Flight Safe. The unique surface is integral to the tray for a smooth, long lasting finish. Its surface won't peel or rub off and is also incredibly easy to clean.

Exclusive leading technology

It boasts the same low profile as the Mira Flight Low tray, of just 40mm depth and features our BioCote® technology, which is proven to reduce bacteria and mould growth by up to 99.9%. This super sleek Mira Flight tray also has a waste as standard that rapidly drains water away from the tray.

Other outstanding features include:

- Tray has Mira Flight Safe anti-slip surface
- Easy to clean – anti-slip surface tested extensively
- The same white colour (matt finish) as other Mira Flight trays
- Optional riser kit featuring strong 'push-fit' legs for solid floor applications
- Optional integral upstand for water tight performance
- A slimline waste cover
- 10 year guarantee for home use

Mira Flight Safe trays

Product features

- Tray has Mira Flight Safe anti-slip surface
- Easy to clean – anti-slip surface tested extensively
- Only 40mm high
- Scratch, chip and discolouration resistant
- Optional riser kit featuring strong 'push-fit' legs for solid floor applications

- Waste which rapidly sucks water from the tray from up to 25 litres a minute
- Includes BioCote® to reduce bacteria and mould growth by up to 99.9%
- Variants with integral upstands for watertight performance
- 10 year guarantee for home use

Shower trays & wall panels

Taps

As with our showers, everything about our taps has been meticulously designed and crafted. Each one is strikingly elegant and created using only the best materials, so take a closer look.

The exciting Aspects Collection will complement any bathroom perfectly.

We've got a wide range of styles to choose from, from contemporary shapes to more elegantly curved, or traditional designs. Yet where they all differ in form, they are identical in quality.

Taps

Mira Comfort

The Mira Comfort range takes an already renowned design and brings it right up to date with its sleek looks, robust construction and ease of use. The fluid chrome styling, meticulous attention to detail and exceptional quality all make this familiar design a real favourite for many who're looking for an eye-catching tap that fits with any style of bathroom.

Product features

- Soft, fluid contemporary design
- Integrated flow straightener for ease of cleaning
- Genuine performance even at low pressure
- Comfort complements the Mira Coda mixer shower range (See page 20)

Accessories

Mira accessories are carefully designed with great attention to detail and innovative thinking.

Experience the very latest in showering technology

Our design teams are constantly developing new and exciting designs to bring you an even better showering experience. We've got everything, from our innovate showerheads, to our elegantly curved soap dishes and slim-line foldaway shower seats. The Mira range includes:

- Mira Eco is a water-saving showerhead that can save up to 75%* of the water your shower uses and you won't notice any difference to the flow.
- Mira Everclear is specially designed to stop limescale building up, so your showerhead gives a consistent flow, offers great performance and a longer life.
- Mira 360 is a showerhead that literally turns showering on its head. Its simple flip action rotates the head to create four unique and invigorating sprays.

*When compared to a Mira Logic showerhead at 0.5 bar pressure. Mira Eco is not suitable for electric showers or gravity fed systems under 0.5 bar pressure.

The Mira showerhead range

Whether you're looking for a fixed, adjustable or power showerhead, we have the model to match. All of our showerheads are universal fit, so will fit with any standard shower hose. A simple screw thread connection makes installation quick and easy.

Approval Marques

Assesses products for compliance with regulation 4 of the Water Supply (Water Fittings) Regulations 1999.

Developed by the BMA to raise awareness of bathroom products that when installed and used correctly use less water and save energy.

Certifies Type 2 Thermostatic mixing valves for the domestic market to promote the safe use of hot water, with the immediate focus on social housing.

Awarded by the BEAB to products that have been evaluated against the highest European and International standards.

Waterwise is the leading authority on water efficiency in the UK. Every year they award their Marque to products that cut back on wasted water.

Awarded by the BEAB to products that have been additionally tested on performance relating to application in the care sector.

Shows that the product has been endorsed by the Royal National Institute of Blind People (RNIB).
